

Date: August 11, 2011
Product Name: Quest Authentication Services
Product Version: 4.0.3
Contact for more information: <http://www.quest.com>

Summary table

Criteria	Supporting features	Remarks and explanations
Section 1194.21: Software Applications and Operating Systems	Supported. Please refer to the VPAT later in this document.	
Section 1194.22: Web-based internet information and applications	Not applicable	QUEST AUTHENTICATION SERVICES does not provide a web-based interface
Section 1194.23: Telecommunications Products	Not applicable	QUEST AUTHENTICATION SERVICES is not a telecommunications product
Section 1194.24: Video and Multi-media Products	Not applicable	QUEST AUTHENTICATION SERVICES is not a video or multi-media product
Section 1194.25: Self-Contained, Closed Products	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
Section 1194.26: Desktop and Portable Computers	Not applicable	QUEST AUTHENTICATION SERVICES is not a desktop or portable computer. QUEST AUTHENTICATION SERVICES is defined as software under 1194.21.
Section 1194.31: Functional Performance Criteria	Supported. Please refer to the VPAT later in this document.	
Section 1194.41: Information, Documentation and Support	Supported. Please refer to the VPAT later in this document.	

Section 1194.21 Software applications and operating systems

Criteria	Supporting features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Supported	Keyboard access is provided throughout VINTELA AUTHENTICATION SERVICES.
(b.i) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards.	Supported	QUEST AUTHENTICATION SERVICES does not disrupt or disable accessibility features of other products.
(b.ii) Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Supported	QUEST AUTHENTICATION SERVICES does not disrupt or disable OS accessibility features.
(c.i) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes.	Supported	QUEST AUTHENTICATION SERVICES utilizes standard Windows controls and dialogs to provide visual focus and tracking.
(c.ii) The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.	Supported	QUEST AUTHENTICATION SERVICES utilizes standard Windows controls and dialogs which allow assistive technology to track focus and focus changes.
(d.i) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology.	Supported	QUEST AUTHENTICATION SERVICES utilizes standard Windows controls and dialogs to provide information about interface elements.
(d.ii) When an image represents a program element, the information conveyed by the image must also be available in text.	Supported	Images are accompanied by text which describes the element.
(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.	Supported	Images used by QUEST AUTHENTICATION SERVICES are consistent across the application's performance.
(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.	Supported	QUEST AUTHENTICATION SERVICES utilizes standard Windows controls and dialogs to provide textual information and input.
(g) Applications shall not override user selected contrast and color selections and other individual display attributes.	Supported	QUEST AUTHENTICATION SERVICES does not provide any mechanism for overriding user selected contrast or display attributes and does not programmatically override these settings.
(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.	Supported	Animations are displayed as part of progress indicators, but a text description is also available.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Not Applicable	QUEST AUTHENTICATION SERVICES does not use color coding as the only means of conveying information etc.
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Not Applicable	QUEST AUTHENTICATION SERVICES does not provide options to adjust color and contrast settings.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	Not Applicable	QUEST AUTHENTICATION SERVICES does not use flashing or blinking text.

Voluntary Product Accessibility

(1) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Supported	Forms are accessible using Assistive Technology including all directions and cues.
--	-----------	--

Section 1194.22 Web-based internet information and applications

Criteria	Supporting features	Remarks and explanations
(a) A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(b) Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(c) Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(d) Documents shall be organized so they are readable without requiring an associated style sheet.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(e) Redundant text links shall be provided for each active region of a server-side image map.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(f) Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(g) Row and column headers shall be identified for data tables.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(h) Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(i) Frames shall be titled with text that facilitates frame identification and navigation	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(j) Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(k) A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(l) When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive Technology.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(m) When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(n) When electronic forms are designed to be completed on-line, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(o) A method shall be provided that permits users to skip repetitive navigation links.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface
(p) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not applicable	QUEST AUTHENTICATION SERVICES does not provide any web-based user interface

Section 1194.23 Telecommunications products

Criteria	Supporting features	Remarks and explanations
(a) Telecommunications products or systems which provide a function allowing voice communication and which do not themselves provide a TTY functionality shall provide a standard non-acoustic connection point for TTYs. Microphones shall be capable of being turned on and off to allow the user to intermix speech with TTY use.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(b) Telecommunications products which include voice communication functionality shall support all commonly used cross-manufacturer non-proprietary standard TTY signal protocols.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(c) Voice mail, auto-attendant, and interactive voice response telecommunications systems shall be usable by TTY users with their TTYs.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(d) Voice mail, messaging, auto-attendant, and interactive voice response telecommunications systems that require a response from a user within a time interval, shall give an alert when the time interval is about to run out, and shall provide sufficient time for the user to indicate more time is required.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(e) Where provided, caller identification and similar telecommunications functions shall also be available for users of TTYs, and for users who cannot see displays.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(f) For transmitted voice signals, telecommunications products shall provide a gain adjustable up to a minimum of 20 dB. For incremental volume control, at least one intermediate step of 12 dB of gain shall be provided.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(g) If the telecommunications product allows a user to adjust the receive volume, a function shall be provided to automatically reset the volume to the default level after every use.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(h) Where a telecommunications product delivers output by an audio transducer which is normally held up to the ear, a means for effective magnetic wireless coupling to hearing technologies shall be provided.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(i) Interference to hearing technologies (including hearing aids, cochlear implants, and assistive listening devices) shall be reduced to the lowest possible level that allows a user of hearing technologies to utilize the telecommunications product.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(j) Products that transmit or conduct information or communication, shall pass through cross-manufacturer, non-proprietary, industry-standard codes, translation protocols, formats or other information necessary to provide the information or communication in a usable format. Technologies which use encoding, signal compression, format transformation, or similar techniques shall not remove information needed for access or shall restore it upon delivery.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(k.i) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be tactilely discernible without activating the controls or keys.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.

Voluntary Product Accessibility

(k.ii) Products which have mechanically operated controls or keys shall comply with the following: Controls and Keys shall be operable with one hand and shall not require tight grasping, pinching, twisting of the wrist. The force required to activate controls and keys shall be 5 lbs. (22.2N) maximum.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(k.iii) Products which have mechanically operated controls or keys shall comply with the following: If key repeat is supported, the delay before repeat shall be adjustable to at least 2 seconds. Key repeat rate shall be adjustable to 2 seconds per character.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.
(k.iv) Products which have mechanically operated controls or keys shall comply with the following: The status of all locking or toggle controls or keys shall be visually discernible, and discernible either through touch or sound.	Not Applicable	QUEST AUTHENTICATION SERVICES is not a telecommunication system and does not provide telecommunications functionality.

Section 1194.24 Video and multimedia products

Criteria	Supporting features	Remarks and explanations
(a) All analog television displays 13 inches and larger, and computer equipment that includes analog television receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals. As soon as practicable, but not later than July 1, 2002, widescreen digital television (DTV) displays measuring at least 7.8 inches vertically, DTV sets with conventional displays measuring at least 13 inches vertically, and stand-alone DTV tuners, whether or not they are marketed with display screens, and computer equipment that includes DTV receiver or display circuitry, shall be equipped with caption decoder circuitry which appropriately receives, decodes, and displays closed captions from broadcast, cable, videotape, and DVD signals.	Not applicable	QUEST AUTHENTICATION SERVICES is not a video/multimedia product
(b) Television tuners, including tuner cards for use in computers, shall be equipped with secondary audio program playback circuitry.	Not applicable	QUEST AUTHENTICATION SERVICES is not a video/multimedia product
(c) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain speech or other audio information necessary for the comprehension of the content, shall be open or closed captioned.	Not applicable	QUEST AUTHENTICATION SERVICES is not a video/multimedia product
(d) All training and informational video and multimedia productions which support the agency's mission, regardless of format, that contain visual information necessary for the comprehension of the content, shall be audio described.	Not applicable	QUEST AUTHENTICATION SERVICES is not a video/multimedia product
(e) Display or presentation of alternate text presentation or audio descriptions shall be user-selectable unless permanent.	Not applicable	QUEST AUTHENTICATION SERVICES is not a video/multimedia product

Section 1194.25 Self-contained, closed products

Criteria	Supporting features	Remarks and explanations
(a) Self contained products shall be usable by people with disabilities without requiring an end-user to attach Assistive Technology to the product. Personal headsets for private listening are not Assistive Technology.	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
(b) When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
(c) Where a product utilizes touchscreens or contact-sensitive controls, an input method shall be provided that complies with §1194.23 (k) (1) through (4).	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
(d) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
(e) When products provide auditory output, the audio signal shall be provided at a standard signal level through an industry standard connector that will allow for private listening. The product must provide the ability to interrupt, pause, and restart the audio at anytime.	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
(f) When products deliver voice output in a public area, incremental volume control shall be provided with output amplification up to a level of at least 65 dB. Where the ambient noise level of the environment is above 45 dB, a volume gain of at least 20 dB above the ambient level shall be user selectable. A function shall be provided to automatically reset the volume to the default level after every use.	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
(g) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
(h) When a product permits a user to adjust color and contrast settings, a range of color selections capable of producing a variety of contrast levels shall be provided.	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
(i) Products shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
(j.i) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: The position of any operable control shall be determined with respect to a vertical plane, which is 48 inches in length, centered on the operable control, and at the maximum protrusion of the product within the 48 inch length on products which are freestanding, non-portable, and intended to be used in one location and which have operable controls.	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
(j.ii) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Where any operable control is 10 inches or less behind the reference plane, the height shall be 54 inches maximum and 15 inches minimum above the floor.	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product
(j.iii) Products which are freestanding, non-portable, and intended to be used in one	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product

Voluntary Product Accessibility

location and which have operable controls shall comply with the following: Where any operable control is more than 10 inches and not more than 24 inches behind the reference plane, the height shall be 46 inches maximum and 15 inches minimum above the floor.		
(j.iv) Products which are freestanding, non-portable, and intended to be used in one location and which have operable controls shall comply with the following: Operable controls shall not be more than 24 inches behind the reference plane.	Not applicable	QUEST AUTHENTICATION SERVICES is not a self-contained, closed product

Section 1194.26 Desktop and portable computers

Criteria	Supporting features	Remarks and explanations
(a) All mechanically operated controls and keys shall comply with §1194.23 (k.i) through (iv).	Not applicable	QUEST AUTHENTICATION SERVICES is not a desktop or portable computer but relies on a conformant desktop or portable computer
(b) If a product utilizes touchscreens or touch-operated controls, an input method shall be provided that complies with §1194.23 (k.i) through (iv).	Not applicable	QUEST AUTHENTICATION SERVICES is not a desktop or portable computer but relies on a conformant desktop or portable computer
(c) When biometric forms of user identification or control are used, an alternative form of identification or activation, which does not require the user to possess particular biological characteristics, shall also be provided.	Not applicable	QUEST AUTHENTICATION SERVICES is not a desktop or portable computer but relies on a conformant desktop or portable computer
(d) Where provided, at least one of each type of expansion slots, ports and connectors shall comply with publicly available industry standards.	Not applicable	QUEST AUTHENTICATION SERVICES is not a desktop or portable computer but relies on a conformant desktop or portable computer

Section 1194.31 Functional performance criteria

Criteria	Supporting features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	Supported	QUEST AUTHENTICATION SERVICES does not provide built-in assistive technology. QUEST AUTHENTICATION SERVICES utilizes standard Windows controls and dialogs which support Assistive Technology. QUEST AUTHENTICATION SERVICES uses standard command line interactions on Unix which support Assistive Technology.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.	Supported	QUEST AUTHENTICATION SERVICES supports the Windows magnifier application on Windows to provide magnification of text and images. On Unix QUEST AUTHENTICATION SERVICES supports terminals capable of increasing font size to provide magnification of text output.-
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	Supported	There is no mode of QUEST AUTHENTICATION SERVICES operation that requires user hearing.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	Not applicable	Audio information is not important for use of VINTELA AUTHENTICATION SERVICES.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	Supported	There is no mode of QUEST AUTHENTICATION SERVICES operation that requires user speech.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Supported	On Unix QUEST AUTHENTICATION SERVICES does not make use of a mouse or any simultaneous keyboard actions. On Windows, QUEST AUTHENTICATION SERVICES utilizes standard Windows controls and dialogs to provide keyboard navigation using the tab, space and enter keys as is standard in Windows user interfaces.

Section 1194.41 Information, Documentation and Support

Criteria	Supporting features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	Supported	Online help is currently available in Microsoft HTML Help format and in PDF format upon request. Other product documentation is available in PDF format. With a special documentation license, our products support accessibility software that converts .PDF files into speech for the visually challenged.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Supported	
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	Supported	Quest Software's Support Services is familiar with such features as keyboard access and other options important to people with disabilities. For technical assistance in the United States, you can contact Quest Software Support Services on a text telephone at (800) 306-9329 between 5:00 A.M. and 5:00 P.M. Pacific Time, Monday through Friday, excluding holidays.
